DESCRIPTION OF SERVICES

Facial Treatment - We will analyze your skin to determine the avenue of treatment. Deep cleansing of the skin with exfoliation, corrective therapy, and a massage, designed specifically for your individual skin type and condition.

Microdermabrasion - Mechanical exfoliation for treating sun damage, fine lines, wrinkles, enlarged pores, coarse-textured skin, and open and closed comedones; also aids in smoothing scars.

Non-Surgical Face Lift - This tightens and firms up the muscles and reduces slackness. Restores a firmer shape and tone to the face or treated area.

Vascutouch - Radio-frequency therapy for the removal of skin tags and treatment of vascular lesions such as broken capillaries and cherry angiomas.

Peels - Resurfaces the skin and exfoliates the dead skin cells leaving the skin smooth, soft, and shine free. Ask an instructor for further details on individual peels.

Light Therapy - Speed healing of the skin after peels and microdermabrasion. Helps improve hyper-pigmentation and capillary distention.

**All Clients must have a thorough consultation prior to receiving services.*
